Architectural Window Solutions

An Elite distributor for Rational Timber and Timber/Aluminium Composite Windows & Doors

Service and Quality

Built on the knowledge of over 30 years in the window industry, Ecotec offers a personal service, along with a commitment to quality.

At Ecotec we pride ourselves on providing the best service possible to our customers. We recognise that this service may be different from client to client. So whether you are an architect with a keen eye for design with purpose, a contractor whose priority is ease of installation with functionality, or a first time project manager for your own property, were dream designs have to run alongside built in eco-efficiencies, we can help.

The quality of the Rational product is second to none, and Ecotec take great pride in ensuring that this superb product is delivered to you in pristine condition, giving you years of use and enjoyment.

Variety/Flexibility/Size

The Rational product lends itself to all kinds of projects and Ecotec are equipped to handle them all.

We can help select the most appropriate product to work within a refurbishment. Whether it is simply a new front door or the complete re-fit of all openings, ensuring that the style of window is in keeping with the building but gaining the vast benefits of modern windows. Adding an extension can significantly increase the footprint of a home and Ecotec understands how to make an extension increase the 'wow' factor to a property not reduce its asset.

Ecotec are experienced in the house building market and are fully conversant with the needs of the independent building company. We can help in the design process to achieve the maximum energy efficiencies from fenestration required in a modern build, even to Passive House standards, but we also understand the scales of economy and the need for accurate delivery dates.

We are also completely at ease with you if you are creating your own dream home. We understand the big decisions involved in heart or head-lead design and can guide you through the choices, helping to relieve some of the stress.

Process

Ordering your windows and doors through Ecotec couldn't be easier. Starting with either detailed plans or just opening sizes, we will provide a quote to you within days. From here we can help you fine tune the design to ensure the product you receive is just what you want. From ordering your windows and doors, you can expect to take delivery between 6-8 weeks later. The manufacture of your product takes place in Rational's high tech Window Village in Poland, where each item is carefully checked and packaged before shipment to the UK then delivered direct to your site at a date arranged to best suit you.

Satisfaction

Ecotec relies on its reputation and our customers' satisfaction is our priority in our day to day work. Whether you fit the product yourself or choose a Rational approved installer, Ecotec are always on hand to assist with any after sales requirements.

“ Once the order was placed, the delivery arrived in the expected lead-time. Ecotec called us to confirm the date and it came. Any questions that I've needed to ask since the delivery have been dealt with by both Ecotec and Rational very promptly.

I'd be very happy to use both Ecotec and Rational again in the future and wouldn't hesitate to recommend them. ”

Ben Hellowell, Architect, NPS, Castleford

“ Working with Ecotec was very good, I've got nothing but praise. We're not experts and Ecotec guided us along where needed and were happy to speak to our engineer.

Even the pricing response was tremendous. This is what won Ecotec the business in the first place. We contacted other suppliers but they took weeks and weeks to get back. Ecotec's response was immediate. ”

Mrs. Jolly, Jolly & Jolly Properties, London

“ I found working with Ecotec went well. I was kept well informed throughout the ordering process and everything arrived on time and in good order.

I had a couple of issues that I needed help with and they were on hand whenever I needed them. The experience of working with Ecotec has been good, in fact spot on. ”

Jamie Ashton, A Space Architects, Hull

“ Good communication and awesome quality of product. The delivery arrived when we'd been told it would.

The after-sales response has been just as swift and efficient. Excellent service, I would definitely recommend Ecotec and Rational to anyone. ”

Graham Clark, Covertex, Cornwall

This attractive surfacing product allows water to drain through it, reducing the overflow to drains. Made from gravel and re-cycled car tyres mixed with polyurethane, the product offers some amazing benefits:

- porous product, water simply drains straight through it, eliminating surface water standing or drainage overflow issues (SUDS compliant)
- superior alternative to tarmac and block paving
- resistant to extreme temperatures, so no surface cracks
- the rubber content reduces slip and fall hazards
- dynamic physical form means heavy loads will not permanently damage the surface
- grey water attenuation is possible giving it eco/green credentials
- virtually maintenance free
